EXPERIENCE

PRESENT
JUN 2017

Software Engineer

RealtyShares

Lead developer for First Time User Experience (FTUX) project, building components geared toward new investor onboarding

- *Increased call volume by 5x month over month*
- *Improved activation rate from 10.9% to 15.1% month over month*

Spearheaded Style Guide Cleanup project and worked closely with design to research inconsistencies and areas for improvement; presented new style standards and implementation requirements to engineering

- *Improved relations between design and engineering by leading insight meetings to learn design methods and teach React component-writing best practices*
- *Wrote all actionable Jira tickets for this project and cleaned up 3 years' worth of legacy code*

Researched CMS options, designed integration plan for Contentful, presented findings, and owned implementation

- *Converted at least 3 site pages using React/Redux to give marketing and compliance teams more autonomy*
- *Trained engineering and marketing on how to integrate and utilize Contentful, respectively; deemed go-to Contentful expert*

PRESENT
JUN 2017
